Harbinger Systems Joins Oracle Partnership Network

Acquires Gold Partnership for Customizing and Improving the ERP Implementations

JULY 05, 2011:

Harbinger Systems, a leading provider of software engineering services to some of the world's best product companies today announced that it has joined the Oracle Partner Network (OPN). With the partnership, Harbinger brings the ability to customize and improve worldwide implementations of Oracle Apps and E-Business Suite of products.

Harbinger's enterprise software development practice has relationships that have spanned over a decade with key clients in North America, and the company was recognized among the 50 fastest growing Indian companies and 500 fastest growing companies in Asia pacific by Deloitte in 2009. OPN is a collaborative partnership that provides companies with resources to distinguish their offerings.

For Harbinger, the partnership will allow taking the existing and new implementations of Oracle ERP software and improve employee productivity and ease of operations. "We excel in both enterprise software and consumer internet development, and we see a lot of potential in bringing our expertise to Oracle implementations", said Swati Ketkar, Executive Director of Harbinger Systems.

Long a leader in the Enterprise apps, Web 2.0, consumer internet and mobile app development space, the company wants to implement the principles emanating from Web 2.0 and mobile revolutions into the implementations of the leading ERP software.
"Enterprise software in modern businesses need to fast catch up with the new paradigms and technologies brought in by consumer internet in the past decade and by mobile more recently. Enterprise clients want more when it comes to the usability, user interface and interactivity of their business applications", she added. "Oracle implementations across the world will benefit from the services we provide in the Web 2.0 and mobility space".
