

Harbinger Systems paper amongst top 5 'Best of the Best Awards' at QAI's Software Testing Conference

Performance Engineering in Agile Projects

DECEMBER 12, 2011:

Harbinger Systems, a leading provider of software engineering services to some of the world's best product companies today announced that it has been ranked in top 5 'Best of the Best Awards' at 11th Annual Software Testing Conference (STC) 2011 held at Bangalore (India), on December 1st, 2011.

With more than 400 submissions from over 150 organizations, a total of 30 members were invited to present their papers at the conference and Harbinger's technical paper was adjudged amongst the Top 5 papers.

Harbinger's paper presentation 'Managing Performance Engineering in Agile Projects' described how performance testing could be integrated in scrum based agile projects. The paper presentation also covered the process to plan and execute the performance tests, analyze the data and identify the bottlenecks much earlier in the project life-cycle.

Shrikant Pattathil - Senior Vice President, Technology Services, Harbinger Systems said, "We are very happy to receive this appreciation and it is encouraging to see our commitment to Performance Engineering and Advanced Software Testing Services being recognized through this prestigious ranking. With a clear focus on agile project execution and expertise in performance testing we aim to add measurable business value to our clients"

Mr. Navyug Mohnot, CEO, QAI said, "the International Software Testing Conference was created as a unique forum for exchanging, learning and accelerating the implementation of best practices in the domain of Software Testing."

Harbinger Systems offers specialized testing services across platforms leveraging its own custom frameworks and using industry leading tools and technologies. As part of Advanced Testing Services, Harbinger Systems has focus in areas of API testing, mobile application testing, UI automation, performance and security testing and hardware compatibility testing.
