

# Harbinger Technology and Content Services Using Mobile and Social Collaboration to Deliver New Engaging Learning Experiences

Global Outsourcing award winner and Thought leader in eLearning

**PUNE, INDIA; REDMOND, WA, JANUARY 17, 2013:**

Harbinger Systems, a global provider of eLearning software products and services since 1990, continues to focus on its strategy of being a 'one-stop' service provider for eLearning solutions and services.

Offline Content Player and Mobile Content Players developed by Harbinger help learners take eLearning standards compliant (AICC/SCORM) content offline on desktop or mobile devices. Harbinger has also recently developed extensions to learning platforms like annotation engines and recommendation engines for enabling collaborative and social learning.

Harbinger content services is also taking the lead in creating interactive and platform-agnostic learning content for tablets and smart phones by uniquely leveraging its own interactivity tools and appropriate use of custom HTML5 and ePUB3 development. Our "single source content" solution strategy enables us to help our customers and partners develop training content that is easily portable across multiple devices.

'For over two decades, we are privileged to be providing interactivity based products, custom technology and content development services to eLearning ISVs and end-user customers. In the future, we are looking forward to developing new products and service offerings around emerging technologies like mobile, cloud and big data to facilitate new training modalities or improve existing ones', said Mr. Vikas Joshi, Chairman and Managing Director, Harbinger Group. Bob Little Press & PR recently recognized Mr. Vikas Joshi amongst the Top Ten most influential people in the corporate e-learning sector.

To know more about how we can assist in your business needs, please visit Harbinger Group, at booth #15, Learning Technologies Conference, London on Jan 29 and 30, 2013.

Please do attend Harbinger's seminar sessions 'Content distribution strategy through multiple devices' and 'Platform-agnostic interactive eBook -new frontier in mLearning', at the conference. Visit our website, [www.harbingergroup.com](http://www.harbingergroup.com) for more details.

## ABOUT HARBINGER SYSTEMS

Harbinger Group is a global provider of software products and services since 1990. The Harbinger Group companies are Harbinger Systems and Harbinger Knowledge Products.

Harbinger Systems is a leading provider of software engineering services to some of the world's best product companies. The services from Harbinger Systems span across enterprise software development, advanced testing services for software ISVs and solution consulting in the eLearning domain. Harbinger is known as a thought leader in eLearning industry and provides solution consulting and technology services to organizations across the globe.

Harbinger Knowledge Products is a globally recognized innovator of interactivity tools and a trusted outsourcing partner in the development of interactive eLearning, Mobile, Social and Blended learning content.

Since 1990, Harbinger has developed a strong customer base worldwide. Harbinger's customers are software product companies, including hi-tech startups in Silicon Valley, to leading product companies in the US and large in-house IT organizations.

Harbinger Knowledge Products and Harbinger Systems have both achieved the distinction of being amongst the fastest growing technology companies in the Deloitte Technology Fast 500 Asia Pacific and Deloitte Technology Fast 50 India programs. Harbinger Systems is recognized as a 'Super Star' in 10th Annual Mobile Star Awards™ 2011. Harbinger Systems is amongst 2012 Global Outsourcing Top 100 companies listing by IAOP (International Association of Outsourcing Professionals) and ranked in Top 100 Outsourcing Service Providers listing by Global Services.

Harbinger Group serves customers in over 57 countries through its offices in India, USA and through its partner network worldwide.
