Harbinger Systems with QuickFind Numbers Named "Best of 2014" in the Mobile Star Awards

Honored as 'SuperStar' in enterprise mobile solution-mobile GPS category and 'Shining Star' in consumer mobile apps-Travel mobile app category

PUNE, INDIA; REDMOND, WA, JANUARY 12, 2015:

Harbinger Systems is pleased to announce that QuickFind Numbers (QFN), a highly intuitive travel and navigation application developed by Harbinger for Mapping Innovations Inc has been named one of the best mobile products of year in the 2014 Mobile Star Awards™ program. Mobile Star Awards program is hosted annually by the mobile technology news and directory site MobileVillage.com. Harbinger Systems developed the QuickFind Numbers iOS application which enables navigation and geo location, including off-road positions, in an easier and a more convenient manner. QuickFind Numbers uses a unique eleven digit number, generated by a patented system, to identify a location. Users can easily generate a unique QuickFind Number that helps them to navigate or share their locations with others accurately, to the tune of twenty sq. meters.

The application won the award in two categories:
SuperStar Award in the "Mobile GPS or Fleet Tracking" category under Enterprise Mobile Solutions.
Shining Star Award in the "Navigation or Travel Mobile App" category under Consumer Mobile Apps.

"We care about our customers' innovation and their vision," said Seema Chaudhary, President, Harbinger Systems Inc., "so we developed a better way to provide them with a useful mobile app that increased accuracy of locating or finding a place within no time. To achieve this we used the unique numbering system invented by our customer".

Dale Luger, Founder, Mapping Innovations Inc. says that "Our vision is to apply our patented technology (Digital Addressing System) in everyday life as well as critical events of life. With Harbinger System's strong technical teams; we launched apps that make navigation easier as well as have potential to save lives in emergencies. This award recognition among industry leaders confirms our vision. We plan to build many more revolutionary applications to improve the quality of lives around the world".

The Mobile Star Awards was launched back in 2001 and each year, the program has showcased the best products in categories covering consumer mobile apps, mobile devices, enterprise mobile software or services, technology visionaries, and success stories. Winners are chosen by the nearly ten thousand readers of MobileVillage.com and its bi-weekly "Go Mobile™" email newsletter, which delivers headline summaries and links to the top mobile stories on all of the web's popular mobile technology sites.

"Winning a Mobile Star Award is a great accomplishment that's recognized by the entire mobile industry," says MobileVillage founder and CEO Jon Covington. "Mobile is the fourth great wave of computing, and there are now millions of mobile products competing for our attention. Mobile Star Awards winners and nominees stand out from this crowd as the star innovators to watch and follow".
