

Harbinger Systems to Exhibit at the Internet of Things World Conference 2016

Visit us at booth #325 to witness how new IoT possibilities are being explored in Smart office and Healthcare ecosystem

PUNE, INDIA; REDMOND, WA, MAY 4, 2016

[Harbinger Systems](#), a global company providing software technology services, announced that it would be exhibiting at the Internet of Things World Conference, the world's largest and most comprehensive IoT event from May 10 to 12 at the Santa Clara Convention Center, Silicon Valley, CA.

“Enterprises are harnessing the power of IoT to spearhead large scale digital transformation. Going beyond the connected things, devices and sensors, today, IoT real-time analytics and IoT platforms, standards, have opened new horizons,” says Jyotsna Kulkarni, President, Harbinger Systems. “We are excited to participate in the IoT World 2016 Conference and look forward to exchange views with the industry veterans,” she added.

Harbinger Systems has worked with enterprises and systems helping them build robust IoT applications, intelligent wearable health devices, and smart office products - products that can monitor the environment, office or consumers- patients, people and more.

Harbinger can develop your IoT applications connecting people, process, and things. We have experience in device management through IoT platforms, standards, and APIs. At the IoT World, Harbinger plans to highlight the solutions developed in the smart office, health wearables and analytics space. Visit Harbinger Systems at booth #325 to learn more on how we can collaborate with you in your IoT product or systems development.

With over 10,000 attendees, 350+ industry thought leaders and 200+ exhibitors; the Internet of Things World provides a unique opportunity to meet key players in the marketplace. To pre-book a meeting with Harbinger team to discover how Harbinger can create value for you, please write to us at hsinfo@harbingergroup.com.

Harbinger looks forward to interacting with product companies and industry experts at the Internet of Things World Conference.

About Harbinger Systems

Harbinger Systems is a global company providing software technology services for independent software vendors and enterprises, with a specialization in product engineering. Since 1990, Harbinger has developed a strong customer base worldwide.

Harbinger Systems builds software solutions leveraging social, mobile, analytics, and cloud (SMAC) technologies and IoT (Internet of Things) for domains such as healthcare, human capital management (HCM), eLearning, and publishing. Harbinger Systems also uses emerging technologies like Big-Data

and OpenStack for tech startups. International Association of Outsourcing Professionals (IAOP) ranks Harbinger Systems in The Global Outsourcing 100 listing consecutively for last five years.
