Question and Answers

Q: How would you rate these frameworks for integrating into existing applications?

- **AngularJS**
  Works well with other libraries but there are discussion threads in community which suggest to do it without jQuery and jQueryUI

- **Backbone**
  Because of its small footprint , it's easy to include with multiple client-side libraries and server side technologies

- **Ember.js**
  Intended to control your whole page at run-time so not suited for use on only part of a page

Q: Is it necessary to use MVC framework for developing SPA?

There is no thumb rule that mandates use of JS MVC framework for any type of UI applications. In case of SPA, there is lot of UI side processing is needed which also calls for very modular approach. MVC frameworks helps in achieving desired modularity as well different inbuilt features complements overall development process. That's why its recommended to use one of such framework based on need of your application.

Q: What are the prerequisites if one wants to learn these MVC frameworks?

- Knowledge of JavaScript
- Understanding of SPA concepts and
- Basic understanding of MVC design pattern

Q. How about the deployment mechanism for the frameworks, do these frameworks provide any extension for it?

Application deployment mechanism/strategy has no direct dependency on these frameworks. These frameworks are more of a JS dependency for overall deployment process and mostly tools/technologies under DevOps umbrella has support for it.
