

Harbinger Systems to exhibit their HR Tech services at UNLEASH America 2019

Harbinger Systems, a global company providing software technology services, will be exhibiting at UNLEASH America 2019, booth #B04 to be held from May 14th - 15th, 2019 in Aria Resort, Las Vegas.

PUNE, INDIA; REDMOND, WA, USA, May 13, 2019

UNLEASH America is the most exclusive, innovative, and impactful event for HR leaders. It also attracts a community of workforce technology buyers and solution providers who are helping transform organizational functions. UNLEASH America is one of the most popular platforms to hear, discuss, and understand new technologies and solutions in the HR Tech domain.

New technologies such as Artificial Intelligence (AI), Conversational Interfaces, Natural Language Processing (NLP), Pattern Recognition, Machine Learning (ML), and Data Visualization are proving to be useful in modernizing HR Tech solutions. These technologies are used to build chatbots, virtual assistants, and automation of HR functions. Hiring process is complex and can be simplified by implementation of technologies for functions like onboarding, candidate shortlisting, and scheduling interviews. Use of chatbots will increase the employee engagement and resolve employee queries quickly. Automating the interview selection panel will improve efficiency while selecting right candidates, remove bias caused because of human intervention, and reduce the turnaround time for the complete hiring process. Considering these aspects, Harbinger is making strides in developing solutions for products that will benefit HR Managers.

Harbinger is exhibiting at UNLEASH America 2019 expo and looking forward to meeting Product Development Heads, CTOs and HR Managers to learn more about their experience in building next-generation HR Tech solutions. Visit Harbinger Systems at booth #B04. Interested participants can reach out to hsinfo@harbingergroup.com to book a meeting with leaders from Harbinger Systems.
