Harbinger clinches 'Best Advance in Learning Management Technology' Award

Harbinger continues its forceful strides in EdTech with a winning solution provided to a learning academy. While helping educators digitize and scale up operations, the platform enhanced dynamic collaboration, customized interactivity, and learning impact.

December 24, 2020

Harbinger Systems, a leading EdTech provider recently announced that the Brandon Hall Group honored it with a silver award for 'Best Advance in Learning Management Technology (LMT)'. This recognition came for designing and developing an advanced learning system for eLearnAc, a coaching academy specializing in imparting mathematics and physics education to high school students.

The eLearnAc platform was inspired by Harbinger's commitment to a teacher of international repute to help broaden his reach and impact. "It was not just about teaching but also about inspiring, generating curiosity and motivating students to develop interest in subjects such as Math and Physics. This was the clearly articulated requirement that the founder of the learning academy came to us with. We responded with a completely customized learning solution with the help of right selection of latest technologies that integrated rich content, interactive displays, audio-video tools, real-time in-class experience, and a collaborative ecosystem for the students", said Poonam Jaypuriya, Vice President eLearning, Harbinger Group.

Ninad Sheode, Founder Director of Learners' Academy (eLearnAc) said, "Harbinger started the work on a wonderful LMS/LXP eLearnAc platform in 2019. We were lucky to be ready in 2020 when COVID -19 hit India. We were the first in Maharashtra and arguably in India to switch from physical class to online teaching and learning, without a glitch, within 24 hours (after the announcement of lockdown). We have come a long way since then and I am so excited that the eLearnAc platform is becoming more robust with new user-friendly features being added on a regular basis."

Backed by three decades of experience in developing educational technology products, Harbinger has grown to be a reputed EdTech solution provider through its time-tested frameworks blending technological competency, domain expertise, and a good understanding of content design and development.

"Having worked extensively with a wide range of EdTech companies, we have an in-depth experience of developing EdTech products from start to end. This helps us think differently. We are driven by design thinking that enables us deliver compelling solutions that are creative, easily deployable, dynamic, and catered to meet the needs of students", adds Poonam.

"At a time when the Education Technology market is poised to grow at an exponential pace, Harbinger is fully equipped, geared and committed to offer product development and education solution services to

EdTech product companies across the world. The Brandon Hall Award recognition further bolsters our resolve to deliver innovative and next-gen education experience", adds Shrikant Pattathil, President, Harbinger Group.

About Harbinger Systems

Harbinger Systems is a global company providing software technology services for independent software vendors and enterprises, specializing in product engineering. Since 1990, Harbinger has developed a strong customer base worldwide. Harbinger's customers are software product companies, including Hi-Tech startups in Silicon Valley, leading product companies in the US and large in-house IT organizations. Harbinger Systems builds software solutions leveraging digital technologies for HRTech, WorkTech, HealthTech, and EdTech. The company's patented technology and sound thought leadership has resulted in revolutionary products, including the market leading Raptivity® – an interactivity builder that helps the user build e-learning interactions, Exaltive – an interactive Video Platform, Offline Player and Quillionz – an AI powered automatic question generator.
